Using Cephable's Expression Controls

2 Homepage Overview

1

Expression Controls

Expression Controls are a set of 8 controls that can be added to your Homepage. Each control has a unique expression and can be set to any output you have created. Turning on Expression Controls will add them to your Homepage. Turning off Expression Controls will remove them from your Homepage.

2

Expression Controls Icon

Expression Controls can be turned on and off using the Expression Controls icon. Hovering over the icon will show the number of Expression Controls that are currently on your Homepage.

3

Turn off Expression Controls

4

Turn on Expression Controls

5

Expression Controls can be added to your Homepage by clicking the "Add a new control" button. Each control can be set to any output you have created. Controls can be moved around by dragging and dropping them. Controls can be removed by clicking the "Remove" button.
