

Using Cephable's Companion App

1. Introduction to the Companion App

When you first download the app you will be asked to allow access to your location, camera, and microphone. These permissions are required for the app to function properly.

2. Accessing the Companion App

The app is available on both the App Store and Google Play. You can also access the app via a QR code.

3. Logging in to the Companion App

Once you have installed the app, you will be prompted to log in with your Cephable account.

4. Home Screen

The home screen displays a list of your active projects. You can tap on a project to view more details.

5. Project Details

Each project has a dedicated page where you can view all the data and analytics for that project.

6. Data Visualization

The app provides various charts and graphs to help you visualize your data. You can also export the data to a CSV file.

7. Report Builder

Our Report Builder allows you to create custom reports for your projects. You can choose the data points and the layout of the report.

8. User Profile

You can manage your user profile and account settings from the app. This includes updating your email and password.

9. Account Settings

The account settings page allows you to manage your account information, including your email address and password.

10. Project Settings

Each project has its own settings page where you can configure the app's behavior for that project, such as data collection frequency.

11. Data Collection

The app automatically collects data from your sensors. You can view the data in real-time and export it to a CSV file.

12. Data Analysis

The app provides various data analysis tools, including trend lines and statistical summaries. You can also share your data with others.

13. Data Export

You can export your data to a CSV file or share it with others. The app also provides a link to your data on the Cephable website.

14. Project Overview

The project overview page provides a high-level summary of your project, including the number of sensors and the data collected.

15. Data Visualization

The app provides various data visualization options, including line charts, bar charts, and pie charts. You can also zoom in and out of the charts.

16. Data Collection

The app automatically collects data from your sensors. You can view the data in real-time and export it to a CSV file.

17. Additional Features

The app includes several additional features, such as a dark mode, a search function, and a help center. You can also provide feedback to help us improve the app.

Thank You

We hope you enjoy using the Cephable Companion App. If you have any questions or feedback, please contact us at support@cephable.com.
